

Four New Customers Select QTEC's Q-Star Obsolescence Solution

Corona, CA – April 3, 2014 – QTEC Solutions Inc., a certified minority owned small business enterprise and global provider of innovative software solutions for the control and mitigation of the obsolescence issues, announced today that the company's Q-Star Obsolescence Management solution has been selected for use at four new locations.

SAIC, Turbine Controls International (TCI), Halliburton Singapore, and Korean Aerospace Incorporated (KAI) selected Q-Star as their obsolescence tool of choice in the first three months of 2014. Three of the four new contracts are with new customers. Halliburton, a long time QTEC customer, has expanded its license to its Singapore location.

About QTEC Solutions

QTEC Solutions is a minority owned business enterprise and global provider of innovative component obsolescence and counterfeit solutions for manufacturers of long life products with significant electronic component content. QTEC's flagship product, Q-Star, provides a fully integrated, critical information solution that enables manufacturers to predict, view and manage component life cycles by anticipating possible degradations and disruptions to their supply continuity. With Q-STAR's algorithm based life cycle predictions, collaboration capability, and market leading data accuracy, you gain greater control and management insight for better planning, decision-making and execution across every aspect of the obsolescence process. To learn more about our Q-Star component obsolescence solution contact QTEC Solutions at (951) 270-5357 or sales@qtec.us. 355 E. Rincon Street, Suite 219, Corona, CA 92879. www.qtec.us
